

# NSS welcomes Professor Lawrence Krauss as an honorary associate

Posted: Thu, 28th Feb 2013

The National Secular Society expressed its delight that Professor Lawrence Krauss has agreed to become an honorary associate.

Professor Krauss is one of the world's leading theoretical physicists and has been honoured by all America's physical societies. He is also one of the USA's leading — and most effective — opponents of creationism and "intelligent design". You can read more about his many achievements, his books and articles [here](#).

In the *Wall Street Journal* he wrote: "Perhaps the most important contribution an honest assessment of the incompatibility between science and religious doctrine can provide is to make it starkly clear that in human affairs — as well as in the rest of the physical world — reason is the better guide."
